Authorization for Medical or Surgical Services

I, ______________________________________

Student’s Name (please print)

(the undersigned student hereinafter referred to as “Student”) hereby authorizes an employee of the University of California Education Abroad Program to serve as Student’s authorized representative for the purpose of consenting for medical and/or surgical treatment or services, at the expense of Student, during the participation of Student in the University of California’s Education Abroad Program. This authorization shall become effective at any time Student is unable to consent for the medical and/or surgical treatment himself/herself.

Although Student understands that, when possible, consent of Student (or his/her parent/guardian if Student is a minor) will be sought for any medical and/or surgical treatment, Student agrees that all medical treatment and/or surgery may be performed when, in the opinion of medical authorities, the health or welfare of the Student may be adversely affected by any delay. It is understood that law of the country in which Student is residing may require such permission. It is also understood that any costs or expenses incurred for such medical and/or surgical treatment shall be the responsibility of Student and/or his/her parent or guardian.

Student also authorizes the Student Health Service, Counseling Center/Services, and/or Student’s private physician or therapist to communicate with the Universitywide Office of the Education Abroad Program regarding any health problem Student has while Student is studying abroad, and that this consent shall extend to and apply with respect to any medical and/or surgical treatment rendered to Student pursuant to this Authorization.

This Authorization is valid through the end of your UCEAP program.

TERMS ACCEPTED BY:
